

## **APORTA**

Supporting EU Access to Brazilian National research programmes –  
Acesso por Ciência e Tecnologia no Brasil

Project reference 244388

### **Launch of interactive web portal**

Deliverable D3.5

Work Package 3

Delivery Date: M6 – March 2010

Leading Partner: DLR

Contributing Partner(s): ALL

Dissemination Level: Public (PU)

December 2010

Version 1.0

*Project funded by the European Commission under the  
International cooperation activity of the Capacities Programme  
of the 7th European Framework Programme for RTD.*

1.2.2 Brazilian Calls in the Common Call Database	9
<b>Annex</b>	<b>10</b>

# **1 The ACCESS4EU common web portal, APORTA project homepage and common call database**

The “ACCESS4EU Common Web Portal” and “Common Call Database” were an initiative by ACCESS4EU coordinators, who planned the individual features of the web portal and the database in a joint effort, led by a taskforce from FORTH, DLR, APRE and IRD. Responsibilities and rights were agreed upon in a “Concept for a common web portal” and “Offer for Common Web portal Services” (see annex 1 and 2). The International Bureau of the BMBF is responsible for the coordination of the technical realisation of the web portal and the common call database.

## **1.1 APORTA website**

The website for APORTA is a subpage of the “ACCESS4EU Common Web portal”. It can be accessed via the common webportal entry point [www.access4.eu](http://www.access4.eu); by going directly to [www.access4.eu/brazil](http://www.access4.eu/brazil) or through the URL [www.aporta4.eu](http://www.aporta4.eu). In its different sections, the APORTA project specific website informs about

- Project Partners
- EU-Brazilian S&T Collaboration
- S&T Landscape Brazil
- Find Your RTDI Programme!
- News
- Links
- Contact Us
- Downloads
- Intranet
- FAQ

The ACCESS4EU web portal and the APORTA website have been implemented and made public in February 2010. Its contents are dynamic. All APORTA partners are responsible for the content of the website. The website is maintained and its content is updated by DLR on a regular basis. (For a screenshot of the entry page of the APORTA website, please see figure 1.)

Figure 1: Entry page of APORTA website

## 1.2 The Common Call Database

The ACCESS4EU common call database informs about **calls** and **advertisements of third countries**, which are **open** to researchers from EU Member States/ Associated Countries. It is thus directed at European researchers searching for funding opportunities outside of FP7. The database can be accessed on the Access4EU-webportal (www.access4.eu). The search function and results page of the database are self explanatory and can be used without registration. *(Please see figure 2 and 3 for examples of the search and results page).*

### 1.2.1 Maintenance of the Common Call Database

The common call database is maintained by partners of the 11 participating ACCESS4EU countries (Australia, Brazil, China, India, Canada, Mexico, New Zealand, Russia, South Africa, South Korea, USA). The International Bureau of the BMBF is responsible for the coordination of the technical realisation of the common call database.

Each country specific project is responsible of adding the calls of the country focussed. In order to enter a call, a project has to create a user account. Different types of administration rights were given to different kind of users. *(For an overview, please see annex 3)*. When entering a programme to the database, different kinds of information about the open call will be requested:

1. Country
2. Programme type: *4 options (selection of multiple items possible)*
3. Thematic area: *12 options (selection of multiple items possible)*
4. Keywords: *max. 400 characters incl. spaces*
5. Title of the programme
6. Programme acronym
7. Programme publication date
8. Deadline for proposal submission
9. Programme owner
10. Short teaser abstract: *max. 800 characters incl. spaces*
11. Programme description: *max. 2000 characters incl. spaces*
12. Eligibility conditions: *max. 3000 characters incl. spaces*
13. How to apply: *max. 2000 characters incl. spaces*
14. Budget in €: *max. 800 characters incl. spaces*
15. Max. funding duration
16. Web link to further programme information
17. Contact information programme owner

Further details and instructions for ACCESS4EU project partners responsible for inserting calls in the database can be found in a "User Manual" created by the International Bureau. *(Please see annex4)*.

### **1.2.2 Brazilian Calls in the Common Call Database**

In order to assure quality, all calls entered into the Common Call Database by APORTA project partners have to get reviewed by a second partner before being published.

A set of criteria were established for Brazilian calls to be selected for the Common Call Database, predominantly the following:

- Open currently or at least periodically recurrent;
- Political will of international openness, or at least indication of that interest by programme owners;
- Appropriate funding of individual proposals to arouse interest of participation by the European scientific community;
- Sufficient overall financial resources of the call, so that the competition is not too fierce.

*(For details, please see APORTA deliverable D 1.3.)*

## **Annex**

**APORTA D 3.5**  
**Annex 1**

**Concept web portal ACCESS4.eu**

# Concept web portal **ACCESS4.eu**

(prepared by DLR on behalf of the entire task force)

## Members of the Task Force

**DLR:** Maria Josten (Maria.Josten@dlr.de)  
Olaf Heilmayer (Olaf.Heilmayer@dlr.de)  
**FORTH** Constantine Vaistas [Vaistas@help-forward.gr](mailto:Vaistas@help-forward.gr)  
**IRD** Patrick Sechet [patrick.sechet@laposte.net](mailto:patrick.sechet@laposte.net)  
**APRE** Ben Kubbinga [kubbinga@apre.it](mailto:kubbinga@apre.it)

**Additional Members** (involved in the discussion)

**IRD** Jean Jacques ROUBION ([jean-jacques.roubion@ird.fr](mailto:jean-jacques.roubion@ird.fr))  
**DLR** Anna Schwachula ([Anna.Swachula@dlr.de](mailto:Anna.Swachula@dlr.de))

## General Concept

The presented concept is based on the discussion within the framework of a **Common Dissemination Strategy** (Meeting in Rome, July 2009, organized by APRE) and a task force constituted by colleagues FORTH, IRD, DLR, APRE. It should be seen as a step towards a **common Access4EU portal** and serve as a basis for the discussion within the respective task leader from all 11 Access4EU projects.

The overall concept of the web portal is summarized in Table 1. The **Homepage** (Figure 1) gives a brief introduction about the Access4EU- instruments and an overview of the most recent events and news from all 11 Access4EU projects. A short description of the objectives of the platform will introduce the user to the website. The core element of the web portal, the **common call database** will be placed in the centre of the page. A **calendar of events** will offer an overview of the whole set of project related activities. Key elements/ icons (e.g. logo) will visualize the country specific relation of every single event. Furthermore the homepage will offer every user the possibility to **subscribe to a news** compilation by choosing related project/ country and/or frequency of the information distribution. Most recent events and news from all projects are shown (for more details see Figure 1).

**Flags** in combination with an **interactive world map** will allow the user to access the country specific information (-> country homepage). This is the first crossroad where a link to an external *project specific web site* can be set and users are directly directed to those sites (see Figure on page 2). Depending on the commitment of the different projects it will be possible to provide additional country specific information within the frame of the web portal. Responsibilities and maintenance of these country sections of the web portal is discussed under *Costs* (see below).

Starting with **Navigation level 2** (Figure 2) only country- and hence project-specific information will be provided. This page can mainly be seen as **Country/project specific – Homepage**. The task force will suggest a unique/ common design. An *independence* of every project will be granted through an own unique colour and picture as visual element.

Besides a summary of calls, news and events and a brief introduction a forth point might be included offering the opportunity to provide information about the RTD landscape or other relevant information of the country ("*country reports*"). If a project consortium (Brazil and

Australia are already discussing this point) decides not to create a separate project web site, BUT to provide project information of the project within the web portal a fifth menu point can be added. On the **3<sup>rd</sup> Navigation level** extended information of the menu points mentioned under **level 2** will be provided. It has to be stressed that the *responsibility for the content* of the web portal starting with Navigation level 2 is with the *respective consortium*. Among the suggested structure of the project related website the menu items in this section are adjustable upon requirements (for further discussion see below).

Depending on the decision of each individual project, they can either use the web portal to provide project specific information or from the start page directly link to another separate web site

**Please note:** Even if one project decides to use the opportunity to present the entire project on the web portal **an own URL**, e.g. [www.aporta.eu](http://www.aporta.eu), is advisable. By entering this link you will be automatically redirected to the country specific homepage of the web portal, without being noticed by the user. This ensures that each projects still has his own URL, which is of course important for the exposition of each individual project.

**Table 1 - Summary of the Overall Concept**

<b>Home</b>	<b>Content:</b> <ul style="list-style-type: none"> <li>- map with all countries (alternatively: Flags)</li> <li>- latest news all projects</li> <li>- next event (calendar) all projects</li> <li>- current call (sorted by deadline)</li> <li>- newsletter subscription</li> </ul>		
<b>Navigation: Level 1</b>	<b>Navigation: Level 2</b>	<b>Navigation: Level 3</b>	<b>Comments/ Content</b>
Information office responsible	<b>Sole responsibility of each project for the content AND the technical maintenance/ update</b> (only on request technical support through information possible)		
ACCESS4EU	all projects -News -Events -Call		Description of the instruments of work within this art of EU projects
Country	Project -with Canada -with Brazil -with Australia -ect.	- News - Calls - Events - R&D Country information	Under every project (level 2) – only project related information (e.g. only news within ACCESS4EU with Canada)
What's new?	- News - Calls - Events	- Current information on one topic, the project relation should be highlighted.	Under the item <i>What's new</i> the user will have the possibility to choose between a sample of news, calls and events. <i>News:</i> this page will offer a list of the announcements within different projects as well as general news during the last month. Every news will be assigned to one single project with logo. On that page the user will get an overview of all ACCESS4EU related activities. <i>Calls, Events:</i> see <i>News</i>
Funding Opportunities	"Calls" database: search function	- search results list >> after Click on the desired hit - single call	<i>Pre-defined search:</i> Key words could be determined by Country, Funding Scheme, open/closed, thematic,...
Feedback & FAQ	Contact data and questionnaires		<i>Feedback:</i> It would be useful for our internal evaluation as well as service for our "clients" (visitors).
Intranet	Sharepoint	Share documents	Different groups: (i) General: all documents related to Access4EU (ii) Coordinators only

## Technical Background

The web portal is thought to gather information from all 11 Access4EU projects. For this reason it should be decided on some basic tools to collect this information and basic requirements ensuring an efficient maintenance of the web portal.

**Access4EU Information office** – to ensure that the common part (homepage – Navigation level 1) of the web portal is regularly updated; DLR will implement an **Information office** that as well can provide technical assistance for the country-specific sections, that are in the entire responsibility of each individual project. The information office can also offer to update the country specific sections (costs have to be discussed individually). DLR could carry out the monitoring of information updates and the necessary adjustment in the database (e.g. calls). The information office will offer a “feedback” as well as “FAQ” section. The aim is to give the user (assigned Access4EU project editors) the possibility to communicate and to arrange the set-up of the web platform. To improve the online information exchange DLR could prepare (e.g. once a year) an online questionnaires. Furthermore, the visits statistics will be assembled and evaluated.

**Web content management system** – RedDot will be used (for more details see: <http://websolutions.opentext.com/> or <http://en.red-dot.org/design.html>)

**Web portal = project web site** – if a consortium decides to provide all project specific information (i.e. management board meeting, deliverables, ...) within the framework of the web portal the following points has to be considered:

1. The IKT Service of the DLR will implement the country specific site in a commonly agreed layout.
2. The web content management system is RedDot.
3. The responsibility of content of the country specific section lies with the respective consortium.
4. The content can be either updated by the consortium itself (some technical assistance through the information office is provided) or this duty is transferred to the Information office of the web portal (costs to be discussed)
5. DLR will offer a technical support by editing the content as well as a CMS practical guide for editors.

**Link to Project web sites** - In general, it will be possible that projects provide all necessary information through the web portal. To allow the independence of every single project DLR could offer to instate a link from an exclusive URL-address ([www.access2canada.eu](http://www.access2canada.eu)) to the project deep linked on [www.access4.eu](http://www.access4.eu). This will also allow an easier promotion of the web site and the project in the respective country.

**Intranet (“Sharepoint”)** – the general idea is to give the technical possibility to intensify the information exchange (internal information) throughout the 11 projects. The aim is to communicate with each other, to prepare common marketing strategies and to discuss new proposals online in one single community. Similar “Sharepoints” are already established for the EU projects IncoNet EECA and ERA.Net-RUS.

**Common call database** – it will be an obligation for all projects to feed their information into this database (*Statement P. Froissard*). Nonetheless, an **iFrame with the whole set of information from the 11 projects will be provided to projects that maintain a separate web page**. There are various ways to implement this *iFrame* in the separate pages depending on the content management system. The IKT Service of the DLR will be available for a detailed discussion.

**Please note:**

- (1) the **iFrame** will look like an **integrated part of the “external” project web sites** and not like a foreign body. It will not be apparent that the information is delivered from the common call database.
- (2) A common database structure has to be developed and agreed on in advance (task force already established)
- (3) The **information office will update the common call database at no-cost**. Each project will provide the programme list in an electronic format (e.g. MS Word or Excel documents).
- (4) The sequence of updating should be agreed on the coordinators and/or respective task leader of all 11 projects.

**News** –press releases will be published currently. The user will have the opportunity to subscribe to an individual newsletter. To disseminate the newsletter DLR will implement an automatically mail-system. By subscribing to the newsletter within a context-box on the homepage the user will determine his news assortment on the basis of his project/country choice. Multiple options will be offered too. Furthermore, the mailing- system will differentiate between weekly and monthly distribution of the current information.

Points to be discussed:

- collection of information through online template or excel sheet send to the Information office
- Where should project internal news be displayed (i.e. Management Board meetings)? These information should not be displayed on the Homepage, but can be displayed on the country-specific entrance page

## Costs

**Summary of costs and responsibilities** (more detailed explanations underneath the table)

Action/ Task	Costs	Responsibility	Remarks
<b>Web portal</b>			
+ layout	4000 €	Information Office	
+ Programming of News-letter channel, Databases			
Communication platform	2 PM	Information Office	
<b>Database</b>			
+ update Call – Database	?	Information Office	Information by each project in ( word, excel, ...)
+ update Event Calendar	?		
Colour design - project related sites	300 €	Each project	Can be provided through web design agency
<b>Maintenance</b>			
+ Web portal home page (Level 1)	1 PM	Information Office	All projects need to use the RedDot system – technical assistance can be
+ Project/ country specific sites (Level 2 ff)	?	Each project	

**Other costs**

**+ copyright for picture on project web site 0-500€ Each project**

**provided through  
the Information  
office**

**Web portal** - At the moment DLR tries to cover costs for the development of the layout of the web portal through budgets available in the Access4EU – Brazil and Australia project.

**Maintenance of project/ specific navigation level:**

all Access4EU projects will be invited to use the content management system for free.  
The maintenance (URL) of the web address ([www.access4.eu](http://www.access4.eu)) should be extended once a year.

**Estimated cost:**

- 1 PM for programming the web portal (covered through Information office)
- to give an example: the projects for Brazil and Austria calculate 1 PM/ year related editor
- Annual maintenance of the web address: €40 (covered through the information office)

***For discussion:***

- o A financial contribution of projects not maintaining an own web page, but entirely using the structures provided through is web portal is welcome and should be discussed.
- o In the context of awareness rising it is helpful to creating a cooperated design, by inviting all projects to use the background layout even if they decide on completely separate web sites.

**Database**

**Database-Calls:** information will be collected by each project and provided as Excel file. The database can/ will be updated through personnel of the *Information Office*.

**Database-calendar of events:** the *Information Office* will prepare an entry mask which will enable project members to post their own events. Furthermore, a pre-defined search (country, type of event, month) will be installed too. The *Information Office* will programme a project related calendar which will be linked with the single project web site.

**Estimated cost:**

- 1 PM for programming the databases (is covered through the Information office)
- DLR-PM (it depends on the information flow)

***Updating of databases for calls and calendar is down through the Information Office. Projects should provide the information as MS Word MS Excel file.***

**Newsletter-channel** - For the differentiation within of news set and mailing distribution of the press releases a separate software tool/programme has to be written.

**Estimated cost:** - 0,5 PM for programming the databases

**Communication platform** - DLR uses the *Microsoft Office SharePoint System 2007* and has obtained the license to use this system. The only upcoming costs (PM) are related to the online implementation for the communication platform. DLR will also prepare a guide how to handle the system step by step.

**Estimated cost:**

- 0,5 PM for programming the databases
- DLR-PM (it depends on the participants and the needed support)

**Feedback and FAQ** – the *Information Office* will provide a common mail (**access4EU@dlr.de**) to the user and sort questions by project relation. An online questionnaire could be posted on the website.

**Estimated cost:**

- survey license for online questionnaire
- 0,5 DLR-PM for concept, composition and evaluation

**Design** - The colour design of the project related sections will be prepared from a design agency (subcontract).

**Estimated cost:** 300\_euros

**Marketing** - With the aim to have a common dissemination strategy and to make the web platform well known within the scientific community all project will need different print media like flyers, posters, business cards and so on.

**Estimated cost:** - Design Agency (depending on requirements). *This should be discussed and decided on by the round of coordinators*

## Status

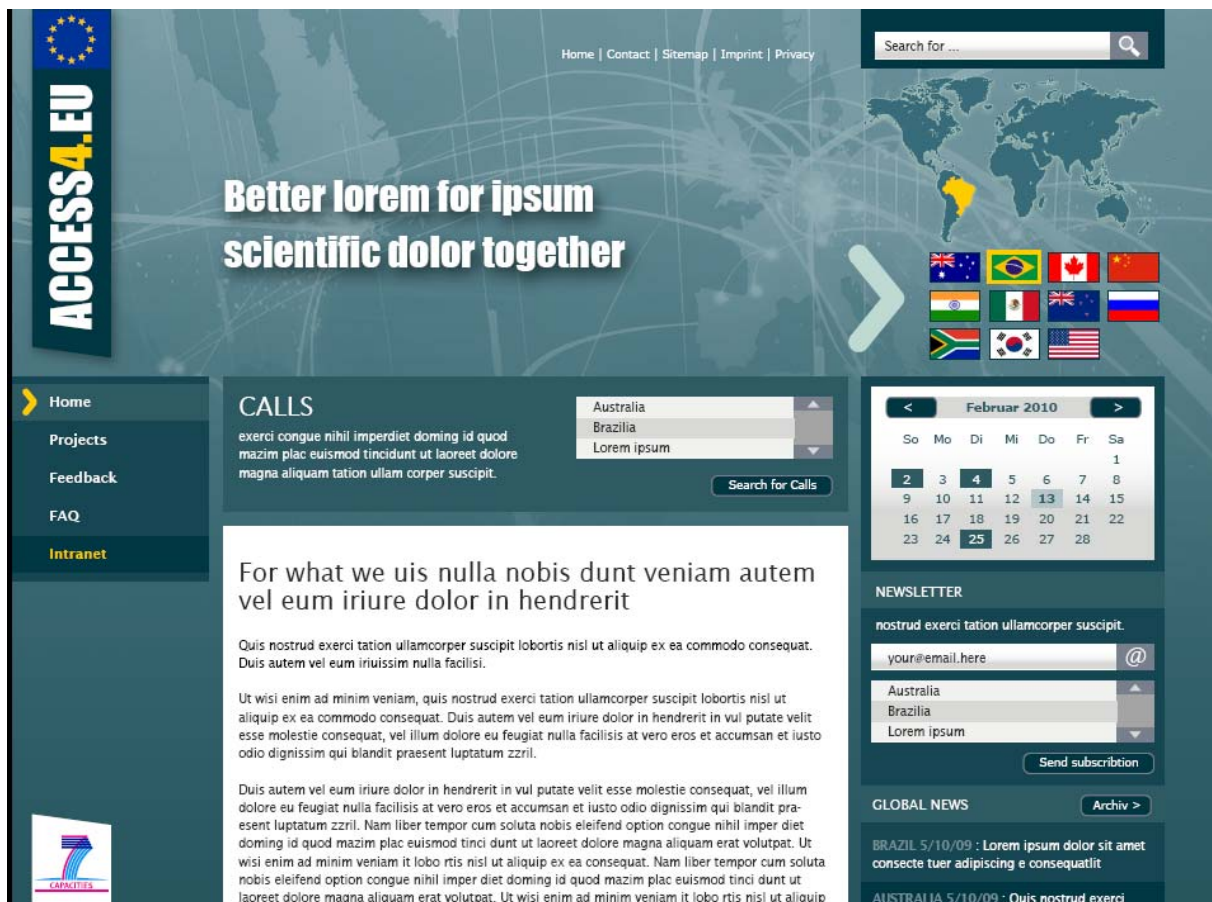

- **Group of coordinators agree on the background layout of the web portal**
- **Each Projects assigns one person for the task force**, so that all upcoming steps and changes of the structure/ content of the web portal can be discussed within this group.
- Final draft of web portal layout send to IT department of DLR **end November 2009**
- **Template for common data base**: task force set up (Members: DLR; IRD; APRE; FORTH)
- **End of December** decision of started projects on the degree of commitment t the web portal
- **End of February 2010**: web portal online!!!!

## Figure 1 Homepage (Navigation level 1)

The entry page (homepage) contains the following main elements:

### Content:

- Navigation map with all countries
- latest news
- next events (calendar)
- Search Mask for Calls/ Programmes
- newsletter subscription

### On the top right

#### Map/Flags with/of all countries:

Countries can be selected either by a click on the map or on the flag. The user will be directly forwarded to the project related website.

### Center column:

**Background information** about the Access4EU instruments and the web portal and **search mask** for calls/programmes

### Right Column:

**Event calendar:** The event calendar is fed through public related workshops, project meetings and conferences of the 11 projects. The current month will be shown; days which are filled will be highlighted. After a click on the date the user will get a list of different project related events.

**Latest news and newsletter:**

Please see the general description on p. 1

**Slogan for the web portal (suggestions)**

**Your gateway to RTD programmes around the world**

**11 Projects – 1 Mission: 4 better international networking**

**Better together**

**Together 4 science**

**Please consider the following already requested changes:**

- Countries with ongoing projects will be presented in a lighter colour, so it is easier to find them on the world map
- When a country/ flag is chosen the name is displayed
- The newsletter box in the 2<sup>nd</sup> column will be replaced by a search mask for the database

**Figure 2 Country entrance page (Navigation Level 2)**

Please note:

Starting from this level the web sites (**content AND the technical maintenance/ update**) are the **sole responsibility of each project** (only on request technical support through information possible)

- **Overview of country/ project specific** information for one country only (i.e. calls, news, events)
- Layout of the background is the same as on the homepage, BUT with a **different colour** (e.g. green for Brazil, blue for Australia, orange for India, ...)
- The picture in the right-hand corner is another **visual tool** to easily **identify the country**. The picture will remain the same as long the user navigates on the different levels of this country

### Information provided

- Calls, events, news for the respective country
- Country report: the idea of this section is to give a brief overview about the RTD landscape of the country. The reports can be structured similar as: <http://www.increast.eu/en/136.php>

### Please consider the following already requested changes:

- Menue on the left-hand side will/ can be adjusted by the DLR IT department

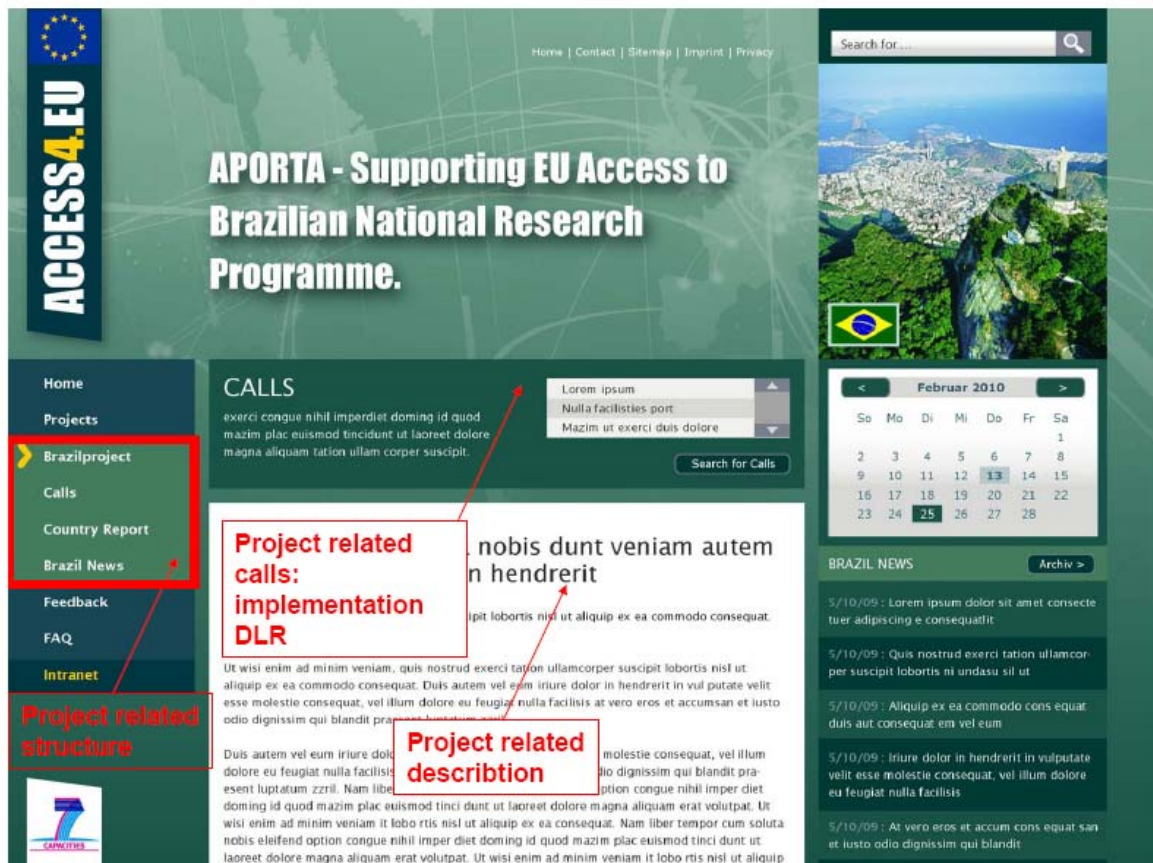

### Please consider the following cost

- Copyright for the picture around €500. As option a flash animation of 3-4 pictures (with additional costs for copyrights)

The figure below gives you some ideas, how the concept can be adjusted. The only restrictions are:

- Menu bar on the left
- A larger central column
- A small column on the right
- 

The calendar on the right hand side is a sub-calendar of the starting page that is maintained by the Information office. Projects will be kindly requested to send their events as MS Word/ MS Excel documents to the Information office.

**Figure 3 Country entrance page (Navigation Level 2)**

Same as before, BUT with space for an individual project logo

The screenshot shows the 'ACCESS4.EU' website interface for the Australia project. The header includes the European Union flag and the 'ACCESS4.EU' logo. The main navigation menu on the left lists: Home, Projects, Australia project (selected), Calls, Country Report, Australia News, Feedback, FAQ, and Intranet. The main content area features a large banner with the text 'Australia lorem for ipsum projects dolor together'. Below this, there is a 'CALLS' section with a search bar and a list of calls. The right sidebar contains a search bar, a large image of Uluru, a 'Space for an individual Logo' placeholder with the Australian flag, a calendar for February 2010, and a list of 'AUSTRALIA NEWS' items.

**Header:** Home | Contact | Sitemap | Imprint | Privacy

**Left Navigation:** Home, Projects, **Australia project**, Calls, Country Report, Australia News, Feedback, FAQ, Intranet

**Main Content:**

**APORTA D 3.5**  
**Annex 2**

**Offer for common webportal services**

## Offer for Common Web portal Services

This offer summarizes the services provided by the Central Information Office of the Access4.eu Common Web portal as well as the associated costs and responsibilities for each project. This is not a legally binding document, but will ensure that all involved parties are aware of their role within this web portal.

### Definitions

#### Access4EU projects

The Access4EU projects that are represented through the Common Web portal are:

Project	Country
AUS-Access4EU	Australia
APORTA	Brazil
ACCESS2CANADA	Canada
ChinaAccess4EU	China
IndiaGate	India
ACCESSRU	Russia
ACCESS2MEXCYT	Mexico
Access4EU:NZ	New Zealand
SAccess	South Africa
KORRIDOR	South Korea
Link2US	USA

#### Central Information Office (CIO)

The Central Information Office, hereafter referred to as CIO, is hosted by the International Bureau of the BMBF at the DLR Project Management Agency ("Internationales Büro des BMBF im PT des DLR e.V."). Personal costs for the CIO will be covered through the Access4EU projects in which the DLR participates.

#### Common Web portal

The Common Web portal ([www.access4.eu](http://www.access4.eu)) is the common access point for all Access4EU projects, that either develop i) a *project specific webpage* under the Common Web portal, or ii) a *separate project website*.

For the first (i), a separate URL will be made available ([www.access4.eu/countryname](http://www.access4.eu/countryname)). For the latter (ii), the Common Web portal will (upon request of the projects) host a single webpage with basic information on the project and a link to the *separate project website*.

A *Common RTDI Programme Database* will be an integral part of the web portal. This database conveys all information on RTDI programmes available in the Third Countries identified by the 11 Access4EU projects.

**Common Webportal services offered by the CIO**

1. **Web portal: layout, general structure, maintenance** (covered through AUS-Access, APORTA)  
NB: During the lifetime of the web portal the common background picture (<http://www.access4.eu/>) can be used by all Access4EU projects for print media. The copyright is with the DLR, please state PT-DLR as picture source
2. **Accessibility of the Common Web portal and *project specific webpages* under the Common Web portal at least 3 years beyond the life-time of the 11 involved Access4EU-Projects.**
3. **Continuous updates of the general Home page (url:www.access4.eu)**
4. **a) Develop and provide access to an online template for updating the Common RTDI Programme Database.**  
**b) Transfer of electronically provided data of access opportunities into the Common RTDI Programme Database (filling in of online database templates)- NB If requested by a project coordinator.**
5. **RedDot System (content management system) for changing the structure and content of the *project specific webpages* and free technical support during the life-time of projects deciding for a *project specific webpage*.**
6. **Intranet**  
NB The kind of intranet depends on the support of the European Commission to install a dynamic intranet ("Share Point"); without extra support, it will be a simple non-dynamic intranet.

Additional services that are requested by the projects have to be decided upon during the meeting of the group of all coordinators. If these services cause additional costs the group of coordinators have to come to an unanimous decision on how the costs are covered.

**Costs and responsibilities for Access4EU projects that develop a project specific website under the Common Web portal****Costs**

<u>Service</u>	<u>Cost</u>	<u>Payment modality</u>
1. Layout of project specific website (colour adjustment) under the Common Web portal.  <b>N.B.</b> Layout can be used for print media. As the copyright for the picture is with the DLR please state "PT-DLR" as source.	€ 300,-	<u>By invoice from the subcontractor who developed the Common Web portal + additional explanation letter, covered by the individual projects</u>

2. <u>Copyright of pictures on project specific website</u>	<u>Depending on the source of the pictures</u>	<u>Only if necessary individual projects have to check this with the agency that owns the copyright</u>
---	--	---

### Responsibility of the individual projects:

1. Continuous update (through RedDot system) of the *project specific websites*.
2. Editorial responsibility for **content** and **pictures** on the project specific websites.
3. Submit a signed copyright form for the pictures to the CIO.
4. All projects commit themselves to contribute information to the Common RTDI Programme Database, as this is a special request from the EC as well as to the common calendar and our newsletter channel.

### Costs and responsibilities for Access4EU projects that develop a separate project website

Upon request the CIO will provide a single webpage about each project that develops a *separate project website*. This webpage will contain a short description of the project in question as well as a link to the *separate external project website*.

There are NO COSTS involved.

### Responsibility of the individual projects:

1. In accordance with the request of the European Commission, the projects who develop a *separate project website* will **submit the results** of the mapping and monitoring of RTDI programmes with Access-opportunities for EU researchers **to the Common RTDI Programme Database** (NB: The data can be entered either via an online template or sent to the CIO that will at NO COST for the individual projects ensure that the data are entered). The task force for the Common RTDI Programme Database (chaired by Constantine Vaitsas, Help-Forward) will provide all projects with a template defining the structure of information needed for the database. Access to the database is defined in the Agreement on information sharing, that is signed by all Access4EU – Projects.
2. Editorial responsibility for **content** and **pictures** on the one page provided. This includes that the individual projects do have the copyright for pictures and submit a signed copyright form to the CIO.

**The above offer is duly signed by the undersigned authorised representatives**

On behalf of the Central Information Office located at the International Bureau of the BMBF at the DLR Project Management Agency the offer is signed

( Dr. Uta Strasser, Head of Working group  
EU – cooperation with third countries)

On behalf of the participating projects the offer is signed by the coordinators:

Please indicate your below your choice for adhering to the Common Web portal:

- ☒ **AUS-Access4EU** will have a *project specific webpage* under the Common Web portal
- ☐ **AUS-Access4EU** will develop a *separate project website* and agrees with the development by the CIO of a single webpage with basic information on the project and a link to the *separate project website*.

Hereby I Dr. Thomas Reineke, German Aerospace Center (name, organisation)

(digital signature)

Confirm that the consortium of the **AUS-Access4EU** project agrees with the above mentioned offer for the Common Access4.eu Web portal.

Please indicate your below your choice for adhering to the Common Web portal:

- ☒ **APORTA** will have a *project specific webpage* under the Common Web portal
- ☐ **APORTA** will develop a *separate project website* and agrees with the development by the CIO of a single webpage with basic information on the project and a link to the *separate project website*.

Hereby I Anna Schwachula, German Aerospace Center (name, organisation)

(digital signature)

Confirm that the consortium of the **APORTA** project agrees with the above mentioned offer for the common Access4.eu web portal.

Please indicate your below your choice for adhering to the Common Web portal:

- ☒ **Access2Canada** will have a *project specific webpage* under the Common Web portal
- ☐ **Access2Canada** will develop a *separate project website* and agrees with the development by the CIO of a single webpage with basic information on the project and a link to the *separate project website*.

Hereby I, **Diassina Di Maggio, Agency for the Promotion of European Research**

confirm that the consortium of the **Access2Canada** project agrees with the above mentioned offer for the common Access4.eu web portal.

Please indicate your below your choice for adhering to the Common Web portal:

- ☒ **ChinaAccess4EU** will have a *project specific webpage* under the Common Web portal
- ☐ **ChinaAccess4EU** will develop a *separate project website* and agrees with the development by the CIO of a single webpage with basic information on the project and a link to the *separate project website*.

Australian Research Council [ARC]

Please give full name of body/bodies responsible for the issuing and administration of the programme.  
Please give country in brackets, e.g. "Foundation for Research and Technology – Hellas (GREECE)"Short teaser abstract:  
(400 characters max.)

Linkage Projects supports research and development projects which are collaborative between higher education researchers and other parts of the national innovation system, which are undertaken to acquire new knowledge, and which involve risk or innovation.

Please enter a short teaser text about the programme.

Programme Description:  
(2000 characters max.)

The objectives of Linkage Projects are to: encourage and develop long-term strategic research alliances between higher education organisations and other organisations, including industry and end-users, in order to apply advanced knowledge to problems and/or to provide opportunities to obtain national economic, social or cultural benefits; enhance the scale and focus of research in National Research Priorities: An Environmentally Sustainable Australia; Promoting and Maintaining Good Health; Frontier Technologies for Building and Transforming Australian Industries; and Safeguarding Australia; foster opportunities for

Description of the programme and references to the actions targeted.

Eligibility conditions:  
(1000 characters max.)

Proposals for funding under Linkage Projects must involve a Partner Organisation from outside the higher education sector. The Partner Organisation must make a significant contribution in cash and/or in kind, to the project that is equal/greater to the ARC funding. A Proposal may be submitted only by an Eligible Organisation. Roles that may be undertaken by researchers under Linkage Projects are: Chief Investigator; Partner Investigator; or

Modalities of participation for **EU participants** including any applicable restrictions.How to apply:  
(1000 characters max.)Apply online through the ARC online application system. A sample application is at [http://www.arc.gov.au/pdf/LP11\\_sampleapp.pdf](http://www.arc.gov.au/pdf/LP11_sampleapp.pdf). See instructions at Sections 10 and 11 of [http://www.arc.gov.au/pdf/LP11\\_instructions.pdf](http://www.arc.gov.au/pdf/LP11_instructions.pdf). All parties involved in Proposals should read and understand the Funding Rules and the ARC draft Funding Agreement before submitting a Proposal to the ARC. Funding under Linkage Projects is provided to Administering

Please enter guidelines on forms completion and documents or contacts to be consulted.

Budget in EUR (approx.):  
(500 characters max.)

Between €20,500 and €34,200 per year. Projects may be funded for one to five years, subject to sufficient funding being available for Linkage Projects, the provisions of the ARC Act, and continued satisfactory progress of the project. In Round 1 2010, 211 proposals were approved with a total value of \$66.82 m. See Section 6 of the Guidelines for details on types of research supported, project costs that may be included in the budget and restrictions on

- Total Budget foreseen and budget for specific activities.
- Any modalities related to the funding of **EU participants**.

Maximum funding duration of  
project in months:

60

### PROGRAMMES

[Back to searchresults](#)

**Title of programme:**  
Australia Fellowship

**Programme acronym:** -

**Programme identifier:** P35

**Programme publication date:** 2010

**Deadline for proposal submission:** 30/07/2010

**Programme owner:**  
Australian National Health and Medical Research Council (NHMRC)

**Programme abstract:**  
The Australia Fellowship is an award to support the salary and research of outstanding researchers with a vision to expand the scale and scope of Australian health and medical research. Australia Fellows will be conducting innovative research at the highest international levels.

**Programme description:**  
The Australia Fellowship is an award to support the salary and research of outstanding researchers with a vision to expand the scale and scope of Australian health and medical research. Australia Fellows will be conducting innovative research at the highest international levels. In this fifth funding round, NHMRC particularly encourages applications from health and medical researchers, whose record of research achievements and vision for the Fellowship, contribute to the translation of discoveries into improvements in clinical care, health services and public health. The aims of the scheme are to: support the most outstanding and creative health and/or medical researchers across the range of disciplines in biomedical, clinical, health services and public health research; foster the expansion of the scale and scope of Australian health and medical research including innovative research that is transformative and with high impact potential; build excellent research teams in Australia, foster mentoring and collaboration and provide opportunities for talented researchers; and undertake research that is of major importance, potentially high impact and of significant benefit to Australians. The research for an Australia Fellowship must be conducted in Australia. Applicants must seek permission from the NHMRC to spend more than three months per year overseas.

**Eligibility conditions:**  
Australia Fellowships are open for application by Australian and non-Australian citizens, currently resident in Australia or in any other country. However: • the research must be conducted in Australia; and • the award must be administered by an Australian Administering Institution. If the applicant is not an Australian citizen, an Australian permanent resident or a New Zealand citizen who holds a Special Category Visa, they must obtain temporary resident status to take up the award. Evidence that the required status has been granted must be provided prior to commencement of the award. International applicants must show evidence of at least a 50% appointment at a non-Australian institution during the 12 months prior to the submission of their EOI.

**How to apply:**  
Applicants should use the Australia Fellowship Round Five Guide for Applicants and submit their proposal electronically, through the Research Administration Office at their Administering Institution, in accordance with the instructions. This documentation is available from the NHMRC website at: <http://www.nhmrc.gov.au/grants/apply/career/index.htm>. All applicants will be provided with the same time period to complete their full application. The full

**Programme description:**

The Australia Fellowship is an award to support the salary and research of outstanding researchers with a vision to expand the scale and scope of Australian health and medical research. Australia Fellows will be conducting innovative research at the highest international levels. In this fifth funding round, NHMRC particularly encourages applications from health and medical researchers, whose record of research achievements and vision for the Fellowship, contribute to the translation of discoveries into improvements in clinical care, health services and public health. The aims of the scheme are to: support the most outstanding and creative health and/or medical researchers across the range of disciplines in biomedical, clinical, health services and public health research; foster the expansion of the scale and scope of Australian health and medical research including innovative research that is transformative and with high impact potential; build excellent research teams in Australia, foster mentoring and collaboration and provide opportunities for talented researchers; and undertake research that is of major importance, potentially high impact and of significant benefit to Australians. The research for an Australia Fellowship must be conducted in Australia. Applicants must seek permission from the NHMRC to spend more than three months per year overseas.

**Eligibility conditions:**

Australia Fellowships are open for application by Australian and non-Australian citizens, currently resident in Australia or in any other country. However: • the research must be conducted in Australia; and • the award must be administered by an Australian Administering Institution. If the applicant is not an Australian citizen, an Australian permanent resident or a New Zealand citizen who holds a Special Category Visa, they must obtain temporary resident status to take up the award. Evidence that the required status has been granted must be provided prior to commencement of the award. International applicants must show evidence of at least a 50% appointment at a non-Australian institution during the 12 months prior to the submission of their EOI.

**How to apply:**

Applicants should use the Australia Fellowship Round Five Guide for Applicants and submit their proposal electronically, through the Research Administration Office at their Administering Institution, in accordance with the instructions. This documentation is available from the NHMRC website at: <http://www.nhmrc.gov.au/grants/apply/career/index.htm>. All applicants will be provided with the same time period to complete their full application. The full application closing date for international applicants will vary depending on the submission date of their EOI. International applicants should indicate any time constraints for the processing of their application to NHMRC through their Research Administration Office. Applications must be certified and submitted by NHMRC registered Administering Institutions. Intending applicants and institutions should refer to the NHMRC Administering Institutions Policy which can be found at: <http://www.nhmrc.gov.au/funding/policy/admininst.htm>

**Budget in EUR (approximately):**

An Australia Fellowship provides €547,000 per annum for five years which includes any additional on-costs which may be incurred. Funds are paid to the NHMRC Administering Institution who will be responsible for the management and administration of the award. Research infrastructure or institutional overheads are not included. It is also expected that the employing institution would provide assistance to successful applicants, for example with set up and relocation costs.

**Maximum funding duration of project in months:** 60

# Userinfo A4EU-Database

Basically the database should be self-explaining. BUT: before you use the database or if any errors occur, please first read/consult this short Manual. If you don't find your answer here please contact Maximo Casas ([Maximo.CasasGuterrez@dlr.de](mailto:Maximo.CasasGuterrez@dlr.de)).

## Input mask:

<http://www.access4.eu/programmes/>

1. Register under "Registration". All Fields are mandatory. Please be sure that members of the same organisations use the SAME wording for their organisation (eg Germany: DLR, not International Buero or IB or Deutsche Luft- und Raumfahrt etc.). If you made mistakes please leave us a note and we will change it)  
After the registration, your account has only editorial rights (see below under "Important notes"). We will give the Country Admin rights to the person named first in the template you received some time ago. If you want to have something changed concerning this, please contact Maximo Casas ([Maximo.CasasGuterrez@dlr.de](mailto:Maximo.CasasGuterrez@dlr.de)).

This is your overview page. Calls marked red have already ended. (Deadline for proposal submission is in the past!). Grey calls are ok.

3. On the right side you see four checkmarks. On the first one you can view the call. The second one is the edit mode. On the third button you can activate/deactivate the call so it is visible/invisible in the search mask (that means you don't have to delete calls, if you want them to be hidden). The fourth button deletes the call from the database if you click yes on the following pop-up. Please note that the edit, activate/disactive and delete button can only be used by people who are defined as "Country Administrators" (See below under "Important Notes").
4. On the top of the list you see the button "New programme". Click here to enter a new programme.

**ACCESS4EU**  
Your Gateway to RTD  
Programmes around the World

**New programme**

Country\*:

Programme Type\*:   
 Research Programme  
 Innovation Programme  
 Capacity Building Programme  
 Multipurpose / Other  
 Select multiple items by holding down the control key and clicking on the required items.

Thematic area\*:   
 Health  
 Food, Agriculture and Fisheries, Biotechnology  
 Information & communication technologies  
 Nanosciences, nanotechnologies, materials & new production technologies  
 Energy  
 Environment (including Climate Change)  
 Transport (including aeronautics)  
 Space  
 Security  
 Other thematic area  
 All thematic areas  
 Select multiple items by holding down the control key and clicking on the required items.

Keywords: (max 400 characters)   
 Please enter appropriate keywords to facilitate the search engine.

Title of the programme\*:   
 Title as given by the programme owner.

Programme acronym:   
 The programme acronym as given by the programme owner.

Programme Publication Date:   
 Please enter date as YYYY.

Deadline for proposal submission:

5. Select the country, programme type, thematic area and so on. Please be sure to use the given format (eg date: dd/mm/yyyy, type the / too!!!). If you choose the “open” box on “deadline submission” you don’t have to enter a date. If fields are not marked mandatory (\*) you DON’T HAVE to enter in the fields necessarily, so before you enter information, you’re not sure about, DON’T enter anything.
6. The contact information fields at the end ARE mandatory. So please check the internet to gather possibly missing information as Contact person, mailing address etc. If you don’t find any information on a special point, enter e.g. “not applicable” or “undisclosed”.
7. Be sure to check the “Privacy”-Box at the bottom.
8. If you click on “delete/clear form” a pop-up opens to ask you, if you are sure!

## IMPORTANT NOTES:

- Please be sure that you don’t enter more than the noted number of characters (including spaces). In some cases you will have to delete parts of the text, so be sure that you delete unimportant information.
- Please be sure that you recheck the orthography of everything you enter!
- Calls can only be activated by your Country Admin, so if you have only editorial rights, don’t wonder if you can’t use the buttons in the overview.

	Programme / Calls				
				Activate Deactivate	
User Group	Add	Edit	Delete	Own	All
Global Admin (only DLR)	X	X	X	X	X
Country Admin (1 per Country)	X	X	X	X	
Coutry Editor	X	X			

- Once a call has been activated, it can't be edited by the country editor anymore. Only deactivated calls can be edited. So if you, as a country editor, want to change something, you have to inform your country admin and ask him to deactivate the call. After you finished editing, inform the country admin that he rechecks and activates the call again. This way secures the final control of the country admin and helps providing high quality.
- Please check (esp. when you copy/paste) that the entered email-addresses doesn't has a space at the end. This causes "This is not a valid email-address".
- When entering URLs take care that you DON'T write http:// in front. This will be done automatically and would result in a duplication in the URL. That means: enter an URL in the format www.xxxxx.xx.
